MAJAR - MATZARIDIS Bros SA:
Your Trusted Partner for Hospitality and Digital Signage Solutions in Southeast Europe.

Since 1978, MAJAR-MATZARIDIS Bros SA has been a leader in distributing world-class digital technology across Southeast Europe.

Operating in 32 countries, we specialize in delivering cutting-edge solutions for Hospitality and Digital Signage, making us the go-to partner for businesses looking to enhance customer experiences and brand visibility.

Our extensive network of business partners and sub-dealers, combined with local expertise, ensures seamless delivery and support across multiple markets. We collaborate closely with system integrators, who play a critical role in bringing our solutions to life, from planning to execution.

Whether it's high-quality displays for the hospitality industry or advanced digital signage for retail and corporate environments, we cater to a diverse range of needs. As a certified supplier for major global organizations, including the military, we also assist with contract tenders on a project basis, providing tailored solutions that meet the highest standards.

With over four decades of experience, MAJAR-MATZARIDIS Bros SA is commited to delivering innovative, reliable, and customer-centric solutions, ensuring your business stays ahead in a rapidly evolving digital world.

Explore our full range of services as you turn the pages, and discover why leading integrators and hospitality businesses trust us for their digital technology needs.

THERMOELECTRIC MINIBARS
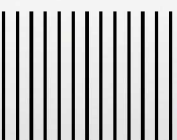

indelB

SIMPLICITY AND EFFICIENCY

Indel B's Thermoelectric Peltier effect minibars are a valid compromise between the most evolved compressor systems and traditional absorption ones. They are lightweight, making them especially suitable for easy installation.

BREEZE LINE

Breeze is the thermoelectric minibar with a 30 and 40 litre capacity and reversible door. The internal compartment is effectively organised and fitted with adjustable shelves and balconies. The refrigerator does not come with internal or external fans and is fitted with a top thermoelectric plate and a special, long lasting sealing with epoxy resin.

TD50

The new TD50 is fitted with a drawer system for easier access to products and their organisation. With its innovative design and customisable door panelling, the minibar can be used to create a vast selection of versatile aesthetic solutions that adapt to all project design requirements.

DRINK T PLUS LINE

Drink T Plus is the new thermoelectric line of minibars with a 20 to 60 litre capacity, reversible door and panel insert. The internal compartment features refined aluminium shelves.

Fridom

Fridom breaks all design rules, bringing the minibar out of its hiding place and transforming it into a piece of furniture that disregards gravity and finds its place under the spotlight.
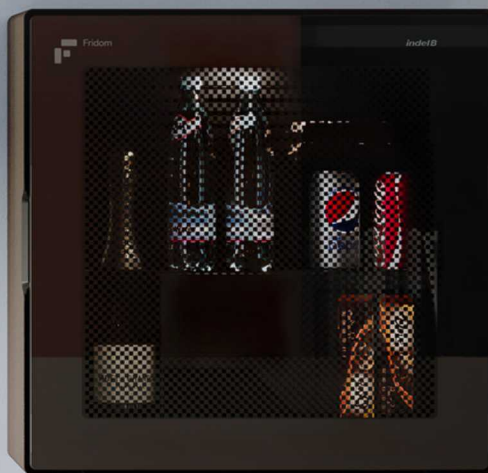

indelB

FREE FROM CONSTRAINTS

FREE FROM RULES

Fridom perfectly combines simplicity and functionality

The Fridom line by Indel B makes minibars totally independent from other elements.
No limits on positioning, easy installation anywhere in the room. Fridom revolutionizes the classic concept of the minibar, delivering an out-of-the-box solution that fulfils concrete requirements that have been set aside for far too long.

reddot winner 2023
CUBE FREESTANDING
Red Dot Design Award 2023
Design by Massimo Mussapi

A large space in a small space

Low volume does not mean low capacity: the smaller size of Fridom refrigerators, especially in terms of depth, is balanced by optimised internal division. Every space was accurately designed to house various beverages and snacks and ensure impeccable service.

Unbeatable ergonomics and more effective cleaning management

Fridom
HORIZON
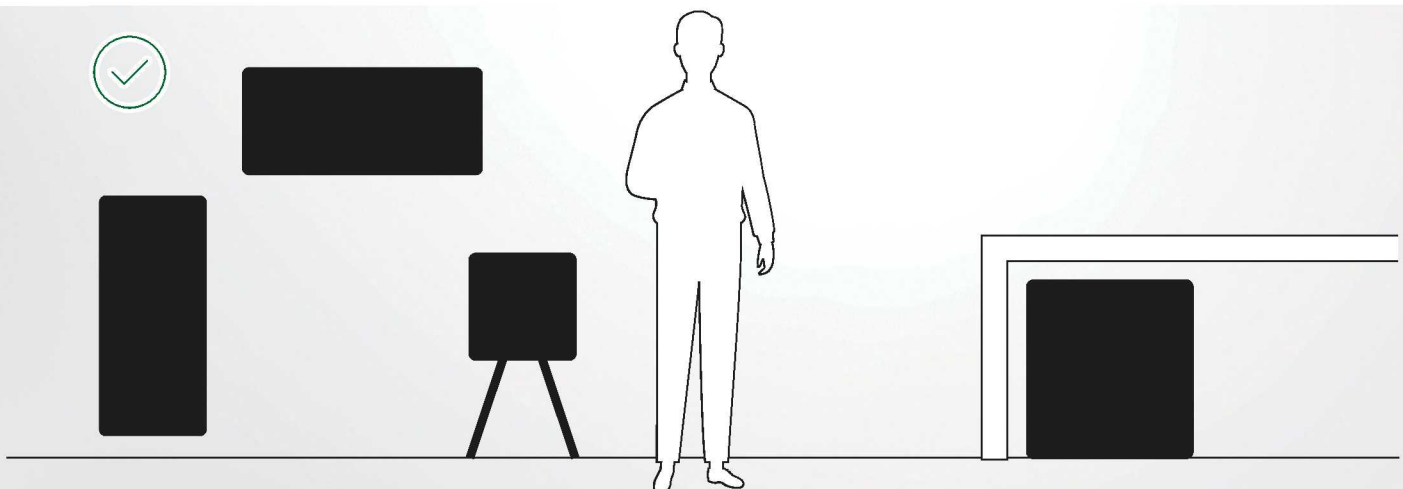

The horizon's line moves upwards. Horizon is the suspended minibar with a horizontal structure for wall or recessed installation.
Its structure clears space on the floor. This model features an elegant glass door that opens downwards.

Why Choose an IP Telephone in the Hotel Industry?

IP telephones are revolutionizing business communication by offering unparalleled flexibility, cost-efficiency, and modern functionality. Unlike traditional landlines, IP phones utilize Voice over IP (VoIP) technology to transmit calls over an internet connection, significantly reducing costs while maintaining crystal-clear voice quality. They are highly scalable and seamlessly integrate with existing IT infrastructure, making them a smart choice for growing organizations. The built-in SIP signaling enables efficient call management, including conferencing and call routing, while the software-based nature of IP phones allows for easy customization and upgrades without hefty investments. Perfect for enhancing productivity and operational efficiency, IP telephones are a future-proof solution that ensures your organization stays connected, efficient, and ahead of the curve.

Why Choose an WiFi Telephone in the Hotel Industry?

WiFi telephones are transforming hotel communication by combining cutting-edge technology with seamless mobility. Unlike traditional systems, WiFi phones operate over a wireless local access network (WLAN), eliminating the need for costly public switched telephone networks (PSTN). This enables staff to stay connected across hotel grounds without relying on personal devices or cellular networks. With features like speed dialing, call waiting, and hands-free calling, WiFi phones deliver crystal-clear voice quality and unmatched convenience. They also ensure reliable communication in areas with poor cellular signal and incur no extra costs, regardless of call distance. Offering security, flexibility, and cost savings, WiFi telephones are the ultimate solution for modern hospitality.

Why Choose an Analog Telephone in the Hotel Industry?

In an increasingly digital world, analog telephones remain a cornerstone of hospitality communication. Their unmatched reliability, cost-effectiveness, and simplicity make them an ideal choice for hotels. Unlike digital devices, analog phones maintain uninterrupted service even during power outages, ensuring guests are always connected. They are easy to use, with features like programmable guest service keys that provide instant access to hotel amenities. Analog telephones are compatible with existing PBX systems and can integrate with VoIP for a seamless hybrid model, offering the best of both worlds. With their durable build, excellent voice quality, and low maintenance costs, analog phones are a timeless, practical solution that enhances the guest experience while streamlining hotel operations.

Your evolutionary cloud platform
unlocking the power, versatility
and intelligence inside
Philips professional displays

Control your devices
from anywhere.

PPDS Wave is a modern, cloud native platform delivering integrated applications and services that put you securely and fully in control, allowing you to integrate, install, manage, update and maintain your Philips professional display fleet devices, regardless of size and from any location.
Focus on solution innovation instead of compatibility. Wave works seamlessly across different display types, generations and verticals. One platform allows you access to the full scale of PPDS solutions.
