Introducing Philips hospitality displays

Powering out of this world experiences for hotel guests around the globe

Making a difference through meaningful innovation. This is a purpose that has driven Philips for almost 130 years. And it is the purpose behind our full suite of Philips hospitality display solutions. From the moment they walk toward your hotel, through check in, and in their guest rooms. In your restaurants, health and wellbeing facilities, events and conferencing suites, and beyond. The Philips hospitality display range has a solution to suit.

Sustainability. Security. Seamless connectivity. It's all part of the service. Empowering hoteliers. Enthralling guests. And bringing your hotel the greatest returns.

Extending your brand through your entire hotel

Whether it is the hotel TVs for your guests to enjoy in their rooms or strategically placed signage and interactive screens around your establishment, Philips hospitality displays are designed to extend your brand, and your opportunities, as well as their experience.

Bring in the personal touch with dedicated messages welcoming your guests from the moment they enter their room. Expand upon their possibilities with seamless messaging guiding them around your property. And take them to new heights with exceptional displays in your restaurants and bars, conferencing rooms, health and wellbeing facilities, and even through to your outdoor areas.

Publisher

Create, push and schedule content for your Business TV with the PPDS Publisher app. Find out more here, or scan the QR code to download the app now.

Street facing signage

Reaching out to draw them in

Why wait until your guest is already in the building to start their journey? Window dressing turns passers-by into customers, extending your welcome and drawing attention.

So, whether in an externally facing window to wrap your brand around your guests before they have entered, or in the internal window of your retail outlet, your restaurant, or any other area, high bright digital signage can make the difference.

**SUSTAINABLE
HERO**

Managing your content, your way – PPDS Wave

Shape your content to suit the situation – either scheduling to suit the time of day, or, better still, managing it remotely, enabling you to time it perfectly with current events, weather, and more – wherever you are, saving time and energy. Simply add a CRD50 to your Philips High Brightness and PPDS Wave to get started.

Lobby and reception areas

Making your entrance and adding the wow factor to your welcome

Build a sophisticated first impression, and elevate your hotel's brand image, allowing Philips digital signage, videowalls and direct view LED displays to augment your warmest welcome with a feeling of belonging.

The feeling you give as your guests walk through your doors sets your guests up for their stay, whether with a larger than life dvLED wall behind your reception desk, an interactive touch screen for self-check in and out, or wayfinding signs guiding them toward your facilities.

Personalise the experience with CMND & Check-In

Welcome your guests and ease the process for your reception staff. CMND & Check-In transforms the hospitality experience, allowing you to use individualised information, such as the guest's name, and preferred language, to increase both personalisation and efficiency. Add special touches for your guests, streamline the billing process, or offer multiple channel packages.

Within your guest rooms

Placing the stars within their reach and bringing the best returns

The best returns on your hotel TV investment come from returning guests. And 73% of people rate customer experience as an important factor in their purchasing decisions. From the moment guests walk into their hotel room, reassure them that they have chosen the best place to stay.

The message is clear with a Philips hotel TV and the options for hoteliers are boundless. With a portfolio of models to suit the hotel and its clientele, taking connectivity, sustainability and return on investment into account. And with a range of networking opportunities to fit infrastructure requirements, installation is made easier, too.

[Discover the range](#)

Sustainability

Selecting a more environmentally conscious hotel is a growing requirement for guests. Delivering on better energy label ratings, Philips MediaSuite and Hospitality TVs are designed on an Android platform. Enabling you to regularly update them with the latest features and functionality, and keeping them the star of the show for longer.

Connectivity

With the Philips MediaSuite and Hospitality TV 4500 Series ranges, Google Cast enables instant and secure wireless casting of your guests' favourite content – shared from their own mobile device onto the big screen in their room in up to 4K resolution.

Networking

When it comes to installing your hotel TV fleet, make sure you have the options to do it your way. Philips hotel TVs flex to your requirements, with a range of networking options, including the Philips Cast Server, bringing easier private connections to every room.

Philips MediaSuite TVs

Introducing the true beauty that lies within the Philips MediaSuite TV

Philips MediaSuite is the ultimate in room TV for guests – delivering on the streaming and sharing, Google Play apps and gaming experiences they want to see in their hotels of choice. And the true beauty of Philips MediaSuite – it is all in the box. Making it the hospitality TV of choice for leading hotels around the world.

[Find all the features](#)

For easy content casting from your guest's mobile device to the big screen, whatever their mobile operating system.

Enabling you to empower your guest with easy and secure log in to their own streaming account directly on the in room TV.

Bringing access to thousands of apps via our Android platform, including movies, music, gaming, and much more.

With the casting button on the remote control itself, your investment can be easily seen and used.

Suite sounds start with Philips MediaSuite ft. the Philips Professional Soundbar

Offer the optimum audio experience with the addition of the new Philips Professional Soundbar. Easy to install, set up and control, and with a built-in subwoofer, designed to bring extra punch to special effects, music, and more.

Think outside the box

Bringing total solutions for your display fleet

When it comes to positioning your hotel apart from the rest, the solutions that you place with your hospitality displays bring a new era of possibility. Philips hospitality displays are designed on an Android platform, making innovative integrations easier. What is more, there is a wide range of options to allow you to integrate your solutions, your way. Check them out...

CMND

Run your display network over a local (LAN or RF) connection. Perform vital functions like updating software and settings, as well as monitoring display status. Whatever the size of your hotel display fleet, the PPDS CMND server makes managing it easier.

CMND & CHECK-IN

Welcome guests using their individual information, such as name and language spoken, to create a personalised experience. Whether you're adding special touches for hotel guests, streamlining the billing process, or offering multiple channel packages.

Wave PPDS

Remotely manage your Philips Professional Displays with the evolutionary, scalable cloud ecosystem, unlocking the power, versatility and intelligence, and delivering energy savings and more sustainable business benefits.

Philips Professional Soundbar

The Philips Professional Soundbar pitches the latest in high quality audio for hotel guests with Philips MediaSuite TVs. Easy to install, set up and control, it comes with a built in subwoofer, designed to bring extra audio punch.

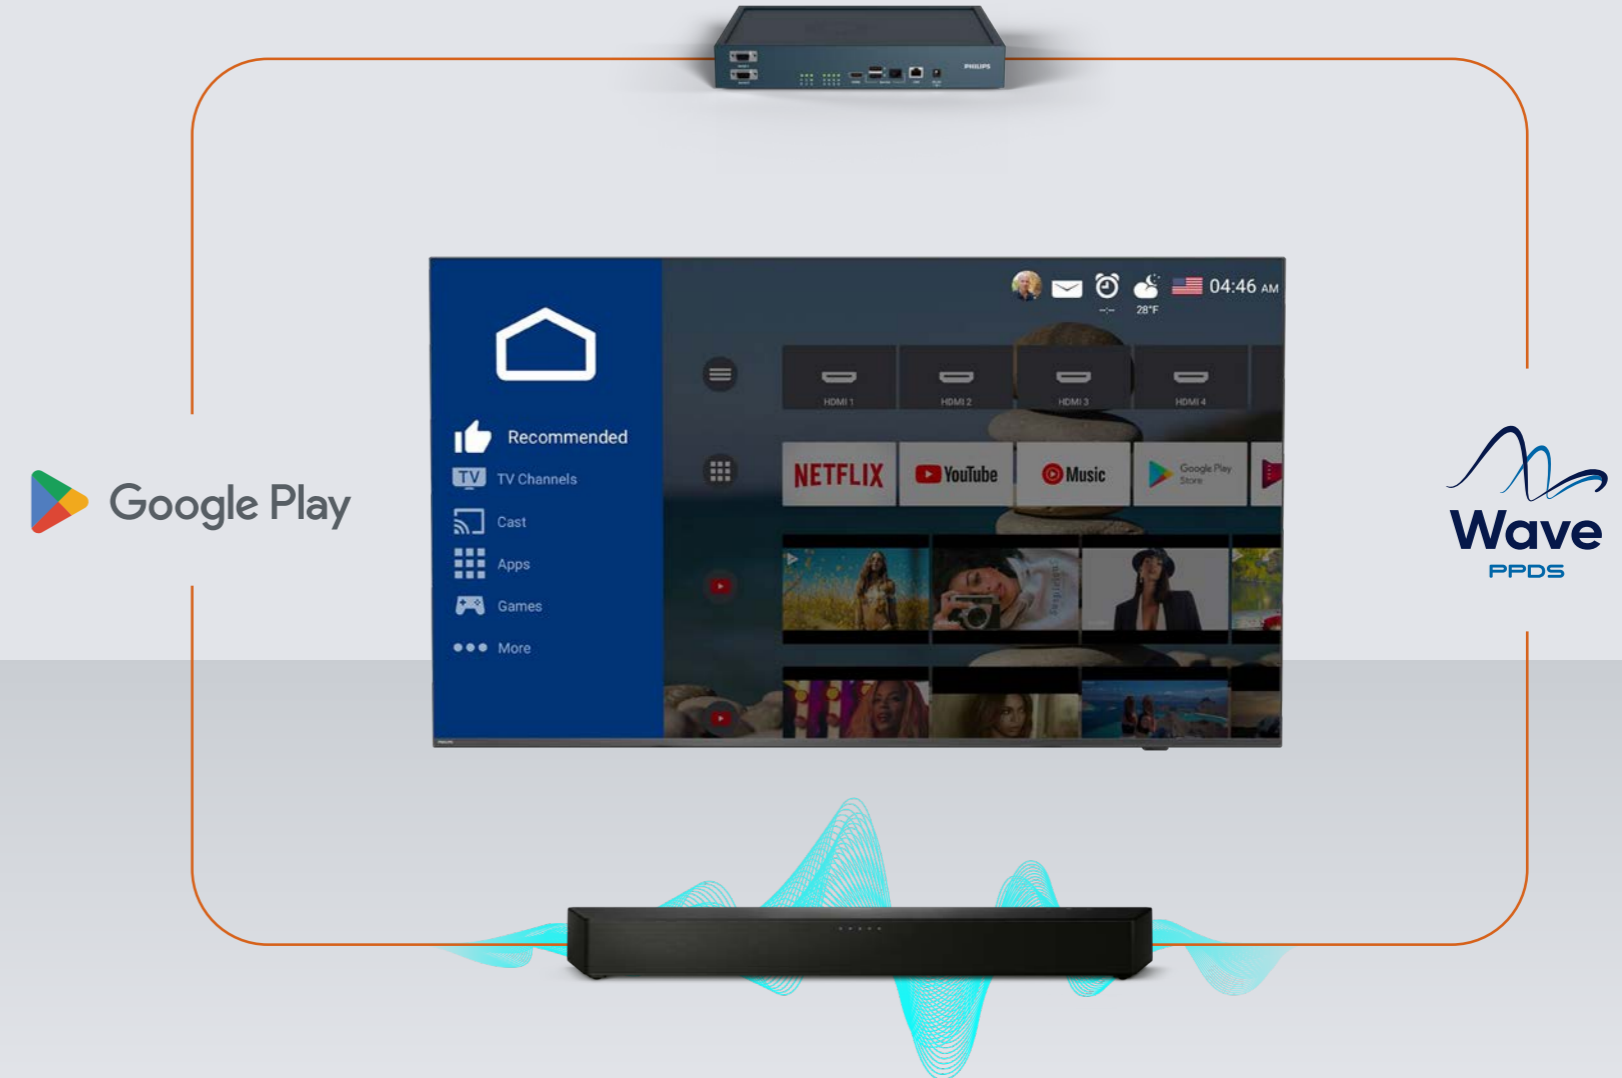

Hygienic remote

Made from anti-microbial materials, the remote is entirely cavity free – including no raised buttons and an anti-theft battery cover – allowing fast and simple cleaning and reducing the risk of harmful germs and bacteria being spread.

Philips Cast Server

The Philips Cast Server operates seamlessly with Google Cast on your Philips hotel TVs. Easily integrate in the same IP network as the TV and onboard via the available CMND interface. A Hotel PMS is required.

Providing a total solution for guest entertainment with Philips Professional Displays
